ZorgSaam!

Seniorenkliniek Oostburg

De Seniorenkliniek Oostburg van ZorgSaam is er voor kwetsbare ouderen om te revalideren na bijvoorbeeld een botbreuk, beroerte of ziekte. Ook kunnen kwetsbare ouderen er tijdelijk terecht na een ziekenhuisopname of als het thuis om medische redenen even niet gaat.

Recover at ZorgSaam's Senior clinic in Oostburg

This senior clinic is specially for vulnerable elderly people to recover after for example a bone fracture, stroke or illness. Also after hospitalization or when staying at home is medically not possible, people can go to our senior clinic, suitable for 16 patients.

Recover close to home

Vulnerable elderly people in the west of Zeeland-Flanders can recover or revalidate close to home, surrounded with familiar people (family or informal caregivers).

Do it by yourself if you can

Stimulating and activating living environment

All is about recovery:
If you CAN, DO it yourself.
With this formula we prepare
people to be independent when
they return home in a
responsible way.

We also offer group and
individual therapy sessions.

Everything is revalidation

Experiences

Mrs. Van Waes-Martens, 71 years

I had a accident by bike and after surgery I could come to Senior Clinic of ZorgSaam to recover. I can recover for three weeks close to home with my relatives nearby. I already know when I will go home and by then I can do it by myself, together with my physiotherapist. The care I receive in this place is perfect, I am happy to say that!

Experiences

Mrs. Mangnus-Staal, 82 years

We all want to stay at home as long as possible, but sometimes it is better to stay temporarily in safe surroundings. The Senior clinic is perfect in this situation, close to home. I cannot think about going farther away. My family can come by as often as they can. I think recovering together with other patients is an added value. Also for the good mood!

Chaincare

Senior clinic has a cooperation with GP, hospital and homecare (and elderly care if needed).

There are two types of care. The specialist in elderly care decides if someone can receive thi kind of care

- Geriatric Rehabilitation Care
- First Line Stay
